Gutenberg App

1. Gutenberg app will be a print of demand Shopify app specifically for iPhone and Samsung Phone Cases.
2. A shopify store owner (Merchant or user) will be able to install the app from Shopify app store. After installing he would be able to print his
own designs on the phone cases using the mockup generator and publish it to his store.
3. Once a website user places an order on the merchant's website the order will be forwarded to Gutenberg app with all the information.
4. Gutenberg app will charge an $x amount to the merchant for every order.
5. Once the payment is successful, the order will show up in Gutenberg app's order page (merchant dashboard) and Admin dashboard.
6. The admin will mark the order as "In progress" at which time it won't be possible for the merchant to make any changes to the order.
7. After the products are shipped by the admin, he/she will import a csv/xls file that contains order numbers and tracking numbers for each order and submit it through the admin dashboard. This should mark the produts as fulfilled in admin and merchant dashboard and sent a notice to Shopify saying the items have been fulfilled and send an email to the merchant's user with tracking information (I believe shopify sends emails by default once you fulfill the orders). This mark the end of the transaction.

Add product

Checkout the video below on how this feature

https://www.youtube.com/watch?v=fXdaLWvxHGE&feature=youtu.be

We will only have 2 products with below variations - iPhone Cases and Samsung Cases

iPhone	Samsung
iPhone 5/5s	Galaxy
iPhone 6/6s	Galaxy S5
iPhone 6	Galaxy S6
iPhone 7	Galaxy S6
iPhone 7	Galaxy S7
	Galaxy S7
	Galaxy S8
	Galaxy S8

Note:
1. Each product variation should have an unique SKU
2. User should not be able to disable any product variants
3. Product image size should be a minimum of 1300*2000 with 300 dpi. If width/height/resolution is below the minimum requirement, show error and do not accept the image. If the image is above the the minimum requirement, allow the user to adjust the image alignment/zoom in or out like shown in the video. Refer image 1
4. Mockup format should only be in JPG format
5. Each iPhone/Samsung variation will have a different image. We will only be displaying back image, no side image. Refer image 2
Refer this link - https://society6.com/product/coffee-reading-5he_iphone-case#s6-4190205p20a9v430a52v377
6. User should be able to edit product title, by default the title will be iPhone Case and Samsung Case
7. User should be able to edit product description, by default the product description will be

"This hybrid case combines a solid polycarbonate back, with flexible, rigid sides. It fits your phone perfectly, and protects from scratches, dust, oil, and dirt.

· Made of a hybrid Polycarbonate (PC) material
· Solid, durable polycarbonate back
· Flexible, rigid thermoplastic polyurethane sides
· Precisely aligned cuts and holes that match your phone's functions
· Easy to take on and off
· .5 mm raised bezel that keeps your phone's screen and camera from scratching on surfaces"

8. Price - Allow user to edit Retail price and show the estimated profit in the right column
9. Allow customers to add custom tags to product

Why do we need your credit card information?

We are not directly affiliated with Shopify, and we operate independent from Shopify. We do not get automatically paid when someone places an order in your Shopify store.

We simply act as a supplier for your business. So when an order is placed in your store, you will receive the full, entire amount of the payment for that order.

Once an order has been placed, you then need to order the products from us, which you can do manually from the Orders page in the App, or you can have it done automatically for you by turning on the Auto Order Processing option on this page.

The payment method you provide here in the Settings page is what you will use to order products from us, when you use the Auto Order Processing option.
